

Techweld® MultiStrike® Tungsten Electrodes

**USE THE SAFER ALTERNATIVE for YOUR OWN HEALTH, PROTECT YOURSELF...!
USE MULTISTRIKES® AND AVOID LUNG DAMAGE**

Techweld® MultiStrike® Tungsten Electrodes for improved TIG Welding

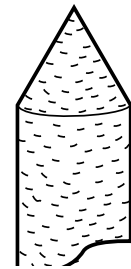

MultiStrike® Tungstens Electrodes have ingredients which greatly enhances electrode life, multiplies the number of strikes per tungsten and do not contain any radioactive material.

Advantage

- Increases the number of arc strikes before re-sharpening is necessary.
- Contains no radioactive material, non radiotoxic.
- Non thoriated, eliminates carcinogenic thoria.
- Non carcinogenic.
- Improved dopant distribution.
- Lowers the working temperature giving cooler welds.
- Special packaging gives guarantee of quality and traceability.
- AC and DC welding.
- All packages are traceable.

2% Thoriated Tungsten showing risk of uneven thoria distribution

MultiStrike® Tungsten showing double the dopant with even distribution
