

# QuickPurge®

for Purging Tube, Pipe and Pipeline Joints

Weld purging of tube and pipes has never been so easy with Huntingdon Fusion Techniques HFT's range of QuickPurge®, enabling you to achieve non oxidised, corrosion free, zero colour welds time and time again! They give payback in just one weld alone.

## Latest Features and Benefits at a Glance

- Automatic gas flow regulation means no burst dams.
- No restriction on gas flow.
- Blue hose as standard for additional inert gas flow when zero colour welds are required.
- The same hose is also used for extra gas to cool the weld metal when required.
- Simply plug and play.
- High temperature resistant material used on the dams.
- Just connect in the inert gas hose and set recommended pressure and flow.
- **PurgeGate®** is fitted to every **QuickPurge® System** as standard.
- Optional heat resistant collars to place around the sleeve to protect it while keyhole tig and keyhole plasma welding.
- Sizes available from 6 to 88" (152 to 2,235 mm).

**\* Please note:**

*These systems are not suitable for the welding of heat treated pipework.  
For that application the HotPurge™ System must be used.*
