

Techweld® MultiStrike® TEG-1000 Tungsten Electrode Grinder

© HFT

- For all diameters and types of tungsten electrodes from 1 mm diameter upwards for GTAW/TIG, Plasma/PAW and resistance welding.
- Providing stable arc performance.
- British manufactured.
- Quiet in operation.
- Separate on and off switches.
- CE Mark.
- 110 Volt and 220 Volt versions 50/60 Hz.
- Easy wheel replacement.
- Bench mounted system.
- Easy to use collet and angle guide system.
- Integral handle making unit portable and easy to move to different locations.
- Long life diamond grinding wheels for smooth finishes and no preferential arcing.
- Special pin vice accessory for holding short pieces of Tungsten Electrodes.
- Variable height feet for levelling on uneven surfaces.
- Low cost system gives rapid return on investment.
- Alternative system with vacuum extraction of dust for easy and safe disposal of powder with no wet or radioactive sludge to worry about.
- A published technical paper is available about tungsten electrode grinding, a copy of which is available on request.
